1. College Event Registration

A college is organizing a technical workshop. A student can register if:

- Their age is between 18 and 25, **and**
- They are currently a student.

Accept the student's age and student status and display whether they are eligible for registration.

---

2. Online Shopping Discount

An e-commerce website provides a discount when:

- The order value is ₹3,000 or more, **or**
- The customer is a premium member.

Accept the order amount and membership status. Display whether the customer qualifies for the discount.

---

3. Airport Check-in

A passenger can proceed with online check-in if:

- Their ticket is confirmed,
- Their passport is valid, and
- Their departure is more than 2 hours away.

Accept the three required values and determine whether online check-in is available.

---

4. Movie Ticket Booking

A cinema offers a special ticket price to customers who are:

- Below 12 years old, **or**
- 60 years old or above.

Accept the customer's age and determine whether they qualify for the special ticket price.

---

5. Bank Loan Pre-Eligibility

A bank wants to perform an initial loan eligibility check. A customer qualifies if:

- Monthly income is at least ₹40,000,
- Credit score is at least 700, **and**
- The customer does not have an existing loan default.

Accept these details and display the eligibility result.

---

6. Food Delivery Free Shipping

A food delivery application provides free delivery when:

- The order amount is ₹500 or more, **or**
- The customer has a premium membership.

However, free delivery is **not available** when the restaurant has temporarily disabled delivery.

Accept the required information and determine whether free delivery is available.

---

7. Employee Work-from-Home Eligibility

An employee can work from home if:

- They have completed at least 6 months in the company, **and**
- Their current project allows remote work.

Accept the employee's experience and project policy and determine whether they can work from home.

---

8. Hotel Room Booking

A hotel allows a customer to book a room if:

- The room is available, **and**
- The customer has a valid payment method.

However, bookings are not allowed if the hotel has temporarily stopped accepting reservations.

Determine whether the booking can proceed.

---

9. Online Exam Access

A student can start an online examination if:

- They are logged into their account,
- Their exam registration is confirmed,
- The examination is currently active, **and**
- Their account is not blocked.

Accept these details and determine whether the student can access the exam.

---

10. Gym Membership Plan

A gym provides a premium membership upgrade if:

- The member has been subscribed for at least 1 year, **and**
- Their current membership is active.

Alternatively, a member can receive the upgrade if they have purchased a yearly plan.

Determine whether the member qualifies for the premium upgrade.

---

11. Ride Booking Application

A customer can book an immediate ride if:

- Their pickup location is within the service area, **and**
- A driver is currently available.

Alternatively, the customer can make a scheduled booking if scheduled rides are enabled.

Determine whether the customer can make a booking.

---

12. E-commerce Product Return

An online store accepts a product return if:

- The product was purchased within the last 7 days,
- The product is unused, **and**
- The product is eligible for return.

Determine whether the customer's return request can be accepted.

---

13. Library Book Borrowing

A student can borrow a book from the college library if:

- They have no overdue books,
- Their library membership is active, **and**
- The requested book is available.

Accept the required information and determine whether the student can borrow the book.

---

14. Job Application Screening

A company is looking for a Python developer. A candidate passes the initial screening if:

- They have at least 1 year of Python experience, **and**
- They know either Django or FastAPI.

Additionally, candidates with 3 or more years of experience are automatically considered for the next stage.

Determine whether the candidate qualifies for the next stage.

---

15. Mobile Data Usage Alert

A mobile application should display a warning when:

- The user's data usage has reached at least 90% of their monthly limit, **or**
- Their remaining data is less than 1 GB.

However, the warning should not be displayed if the user has an unlimited data plan.

Determine whether the warning should be triggered.

---

16. Parking Lot Entry

A vehicle can enter a parking facility if:

- The vehicle has a valid parking pass, **or**
- The driver is paying for visitor parking.

However, entry is not permitted if the parking lot is full.

Determine whether the vehicle can enter.

---

17. Scholarship Eligibility

A student is eligible for a scholarship if:

- Their academic score is at least 85%, **and**
- Their attendance is at least 75%.

Students with an academic score of 95% or higher can qualify regardless of attendance.

Determine whether the student is eligible.

---

18. Food Ordering – Restaurant Availability

A customer can place an order if:

- The restaurant is currently open,
- The restaurant delivers to the customer's location, **and**
- The restaurant is accepting online orders.

Determine whether the customer can place an order.

---

19. Smart Home Security

A smart home system should activate an alert when:

- Motion is detected, **and**
- The security system is armed.

It should also activate an alert when the main door is opened while the security system is armed.

Determine whether the security alert should be triggered.

---

20. Travel Insurance Eligibility

A person can purchase a particular travel insurance plan if:

- Their age is between 18 and 65,
- Their trip duration is 30 days or less, **and**
- They are travelling to a country covered by the insurance.

However, the plan is unavailable if the destination is currently excluded from coverage.

Determine whether the person is eligible for the insurance plan.
